

# Our initial sketches

## Proposals for 480-510 Larkshall Road, Highams Park

Our early sketches for the site are below.

The shape and height of the building has been carefully developed by the architects to make the most of the opportunity to provide new homes, flexible, contemporary commercial spaces, a community facility and station access on the site. The building currently stands at 9 storeys. The images below show how our building has evolved.
